

Why MOVEit?

MOVEit gives you the tools to achieve secure, auditable, automated and compliant file transfer both on premise and in the cloud.

As we move to a hybrid work environment between the home and the office, MOVEit provides secure collaboration and automated file transfer of sensitive data, and advanced workflow automation without the need for scripting.

MOVEit
Progress

INCRAM MICRO[®]

What does MOVEit allow you to do?

MOVEit allows you to:

Manage Transfers

With MOVEit you can consolidate all file transfer activities for better security and control.

Automate Workflows

Eliminates human error by automating tasks and workflows without scripting, improving both accuracy and productivity.

Deploy Anywhere

MOVEit gives you the flexibility you need to be able to deploy it anywhere, whether that is on-Premise, Infrastructure-as-a-Service (IaaS) or Software-as-a-Service (SaaS) within the Cloud.

Flexible Integration

You can integrate MOVEit with any system via the Progress Mulesoft Connector, REST, Java and .NET APIs.

What can MOVEit do for your business?

MOVEit means that you can securely share files across your own enterprise and the globe. MOVEit helps you to reduce the risk of data loss and non-compliance with a fully auditable and managed file transfer solution. As well as reducing risk, you are also able to extend file transfer capabilities to all users to eliminate insecure use of email. You can also quickly onboard partners and other third parties with ease.

Creating automated file transfer tasks and workflows becomes second nature, which means you can boost your business and eliminate the risk of user error. Business records are also accounted for as you are able to track and report on every single transfer that occurs via MOVEit.

MOVEit gives your business the ability to:

Transfer Sensitive Information Securely

Encryption in-transit and at-rest plus advanced security features keeps sensitive information out of harm's way.

Assure Regulatory Compliance

You can easily implement security controls and establish an audit trail.

Let End Users Collaborate Securely

MOVEit means that you are able to ensure secure and compliant sharing of sensitive data for all users.

Accelerate Task and Workflow Creation

With MOVEit you can empower your team with programming-free automation of multi-step, logic-based workflows.

MOVEit gives you the piece of mind that your files transfers are both secure and compliant giving you the peace of mind to focus on your business.
