

# Bringing the best of Google to education, to help transform teaching and learning

We believe everyone deserves access to great learning experiences. It's why we built Google for Education.

**Enable education leaders** to bring innovation to their schools at scale, with the peace of mind that they are investing in secure products that are flexible to their needs.

- Supercharge student outcomes
- Keep data private and secure
- Customize and scale
- Create value at all levels

**Empower every educator** by giving them simple, assistive tools so that they can focus on what they do best: helping students reach their full potential.

- Gain impactful teaching time
- Deliver continuous learning from anywhere
- Collaborate with peers and stakeholders
- Build better school-home relationships
- Access free training and PD

**Equip every student** with the tools and skills they need to be successful, by focusing on inclusivity and accessibility, so we can meet students wherever they are.

- Strengthen connections with educators
- Provide what they need to thrive
- Build skills with lesson-ready content
- Create inclusive environments

**Evolve every day** by continuing to listen to thousands of educators to create and improve upon our existing solutions, ensuring that the latest technology is reflected in the tools we build for teaching and learning.

- Take advantage of continuous innovation
- Deliver the latest features straight to users
- Continually improve student outcomes
- Streamline administrative tasks with AI/ML

## Bringing the best of Google to education

With Chromebooks, every student and teacher can personalize their learning environment, and every IT admin can unlock the full capabilities of Chrome OS with the Chrome Education Upgrade. With Google Workspace for Education and Classroom, we support differentiated and engaging learning experiences. Plus, helpful curricula and educational resources elevate class content at every step. Across it all, there is more choice than ever before.

Provide every student and teacher with  
a **personalized learning environment**

Chrome Education Upgrade

Design and deliver differentiated and  
engaging learning experiences that  
**promote collaboration and creativity**

Google Workspace  
for Education

Google Classroom

**Enhance and elevate class content**  
with a host of educational resources and curricula

Applied Digital Skills

**Be Internet Awesome.**

Teacher Center

CS First

Chromebook App Hub

You have to look at technology as a tool that will do something for the teachers, since they're the ones making the magic happen in the classroom. Many teachers are ready to push their teaching to some unimaginable new levels."

Ronald Carroll, District Manager of Instructional Technology
